

Ham Class Fall 2019

Amateur Radio Training Classes
Tyler Public Library

1st and 3rd Saturday afternoons 2 pm to 4 pm

August September October November December 2019

Classes are free / Materials provided

Class Size 20

Testing Session – Cost per person \$14

We extend an open invitation for everyone interested in learning about amateur radio and obtaining their “Ham Ticket” License. Our initial focus will be the first level; Technician Class License. Although a self-study class program, we are here to assist interested individuals in a stress-free and fun atmosphere!

You are no longer required to know Morse Code to obtain your license. This is the most accommodating hobby especially for folks with disabilities, young people, students, women, and families. This is a great way to meet people in our community and expand contacts around the world. A benefit of this hobby is an introduction to electricity/electronics, science, geography, social studies, emergency communications, personal skill sets and more!

Zombie Apocalypses are not included!

Current ham operators are also invited to come to share your knowledge and experiences too. Learn about the hobby and craft and various aspects of communications by attending club meetings once a month.

See you soon! Contact me with your questions.

Respectfully,

Patrick Brown AK5TX – Instructor/Teacher
