

Spring 2020 Technician Level Amateur Radio Class

**Amateur Radio Training Classes – Technician
Tyler Public Library – Maker Space Classroom
1st and 3rd Saturday afternoons 2 pm to 4 pm
February 1 & 15, March 7 & 21, April 4 & 18, May 2 & 16**

**CLASSES ARE FREE TO ATTEND / MATERIALS ARE PROVIDED & FREE
FCC Test Session – Cost per person \$14**

We extend an open invitation for everyone of all ages and abilities with an interest in learning about our hobby, art, craft, and science of Amateur Radio to attend class including passing and obtaining your own "Ham Ticket" license.

The focus is a self-study program provided in a stress-free and fun atmosphere while you learn. We will widen your horizons with guest speakers and presentations.

You are no longer required to know Morse Code. This is the most accommodating hobby for folks with disabilities too! STEM/STEAM Education via Ham Radio is a practical solution for enhancing school students' abilities and skillsets. Did you know scholarships are available too?

Ham Radio is a great way to learn about people and their cultures throughout the globe as an Ambassador of Goodwill. Another benefit of this hobby is an introduction to electricity/electronics, weather, and emergency communications.

WHEN ALL ELSE FAILS-HAM RADIO!

Zombie Apocalypses are not included!

TARC, (Tyler Amateur Radio Club) meets once a month to share our hobby!

Visit our website: www.tylerarc.org

Respectfully,

Patrick Brown AK5TX – Instructor
